## Objective

Final-year Mechanical Engineering student with skills in Java, Python, and SQL, interested in Backend Development and Data Analytics. Bringing strong problem-solving skills, adaptability, and a willingness to learn and explore new technologies through hands-on projects. Seeking an entry-level opportunity to apply my skills and contribute to real-world software solutions.

## Education

|                                                                                        |                                   |
|----------------------------------------------------------------------------------------|-----------------------------------|
| <b>Sri Sivasubramaniya Nadar College of Engineering</b><br>B.E. Mechanical Engineering | <b>2023 – 2027</b><br>CGPA: 7.416 |
| <b>Govt. Boys Higher Secondary School, Ranipet</b><br>Class 12 (State Board)           | <b>2022 – 2023</b><br>85.16%      |

## Experience

|                                                                    |             |
|--------------------------------------------------------------------|-------------|
| <b>Rocket Software India</b><br><i>Software Engineering Intern</i> | <b>2026</b> |
|--------------------------------------------------------------------|-------------|

- Worked as part of a team during a software engineering internship, contributing to the development of a full-stack project.
- Collaborated with team members to understand requirements, divide tasks, and share knowledge throughout the development process.
- Gained practical exposure to full-stack software development and working in a professional team environment.

## Projects

|                             |                                          |
|-----------------------------|------------------------------------------|
| <b>PG Management System</b> | <i>Spring Boot, PostgreSQL, Supabase</i> |
|-----------------------------|------------------------------------------|

- Developing a PG Management System as a team project to help users discover PG accommodations and allow PG owners to manage their listings.
- Contributing to the backend development using Spring Boot and implementing REST APIs for PG management.
- Integrated PostgreSQL through Supabase for storing application data and worked on Supabase Storage for PG images.
- Gained practical experience in REST APIs, backend development, database integration, cloud storage, and team collaboration.

|                                  |             |
|----------------------------------|-------------|
| <b>Student Management System</b> | <i>Java</i> |
|----------------------------------|-------------|

- Developed a Java-based Student Management System to manage student records with Add, View, Search, Update, and Delete functionalities.
- Implemented CRUD operations with CSV file storage and automatic loading and saving of student data.
- Gained practical experience in applying OOP concepts and building a structured Java application.

## Technical Skills

- **Programming:** Java, Python
- **Frameworks:** Spring Boot
- **Database:** SQL, MySQL
- **Core Concepts:** OOP, DSA, Problem Solving
- **Data Science:** Data Science Fundamentals
- **Soft Skills:** Adaptability, Collaboration, Self-Learning

## Achievements

- Secured First Rank at Government Boys Higher Secondary School, Ranipet.
- Awarded the SPURS (Student Potential Under Rural Scholarship) Full Merit Scholarship at SSN College of Engineering.

## Certifications

- Java Programming Masterclass – Udemy
